| CTE         | Chunked Transfer Encoding, inbound and outbound                                             |
| FN          | Filename Preservation of Payload                                                            |
| FN-MA       | Filename Preservation for Multiple Payloads                                                 |
| FN-MDN      | Filename Preservation with MDN Error Reporting                                              |
| MA          | AS2 message supports Multiple Attachments (Payloads)                                        |
| Reliability | AS2 messages and MDN delivery retried after network failure, retry or resend                |
| Restart     | AS2 message restarts transmission from point of failure for very large payloads             |
| SHA-1       | Secure Hash Algorithm 1, all participants are required to support SHA-1                     |
| SHA-2       | Secure Hash Algorithm 2, optional                                                           |

**Reference**

- 
- (1) Asynchronous MDNs outbound-only
  - (2) Inbound only over SSL with AES/SHA2
  - (3) Outbound only
  - (4) Inbound only
  - (5) Encryption required, asynchronous MDNs outbound only, asynchronous MDN retries not tested
  - (6) AES-128 only
